JAVA 編譯成 JAR 可執行檔步驟

1. 點選 File > Export

```
Alt+Shift+N > № 🗾 😜 🔡 📳 ୩ | ** ▼ 👂 ▼ 🖫 ▼ 💼 ▼ 🗣 🌣 🏚 🖋 🕬 🕍 ▼ 🎁 ▼ 🎁 ▼ 🖊 🕶 🕶 🗡
  New
                          Open File..
  Recent Files
  Close Editor
                     Ctrl+W
                  Ctrl+Shift+W
                          UnitSamples() {
                       F5 Ended() {
                        ntln("Daq has ended.");
Properties Alt+Enter eviceName() {
  Switch Workspace
  302
  303
         class GenerationThread implements Runnable {
  304●
  305
  306
             @Override
             public void run() {
  ^307
                 stillRunning = true;
  308
                 if(!params.isConnected){
  309
                    JOptionPane.showMessageDialog(null, "please reconnect to Poseidoon
  310
                 while (dontStop && params.isConnected) {
  313
                    generateData();
```

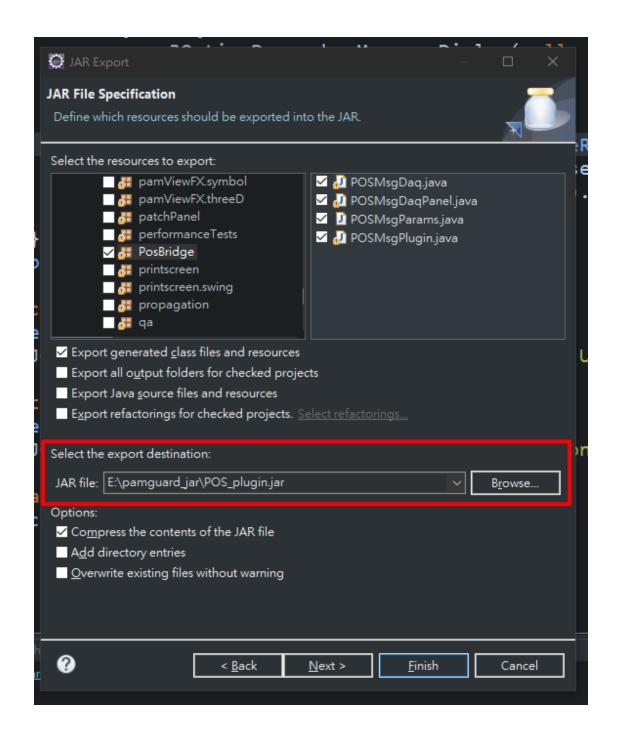

2. 滙出 Java > JAR file

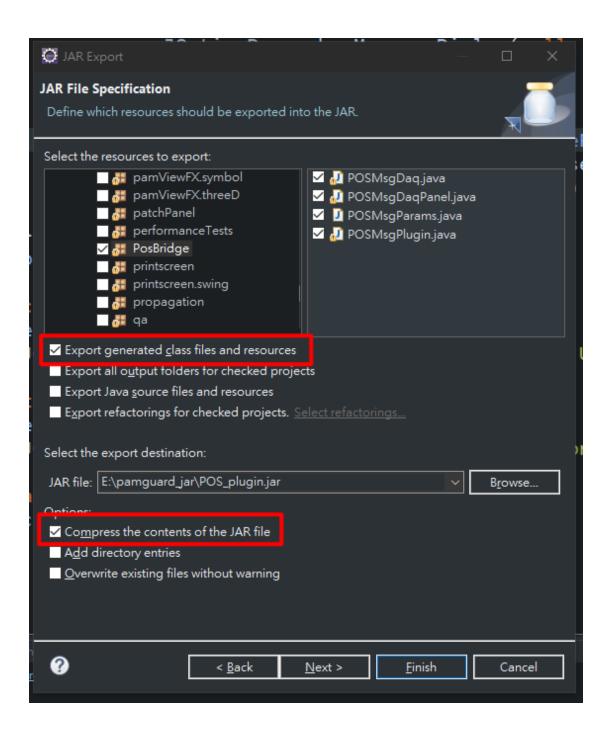

3. 選擇 PamGuard Main DG > SRC 裡面的 PosBridge 套件

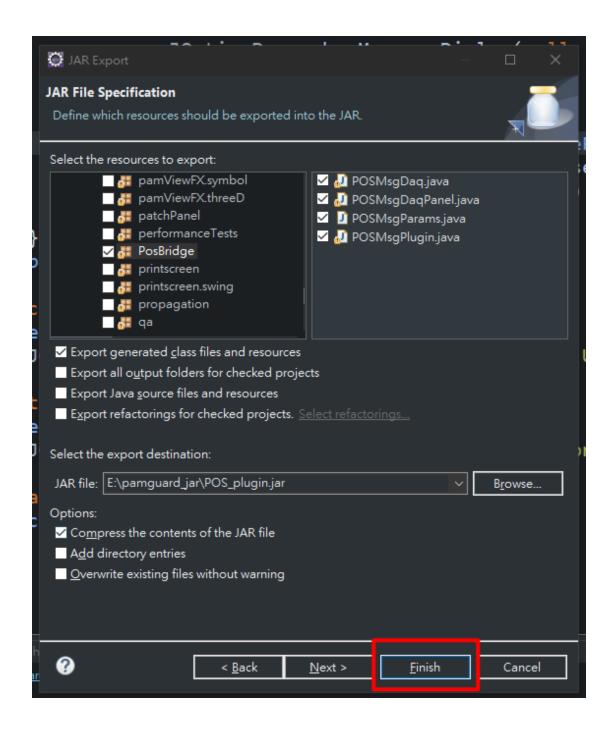

4. 選擇匯出 JAR 檔路徑

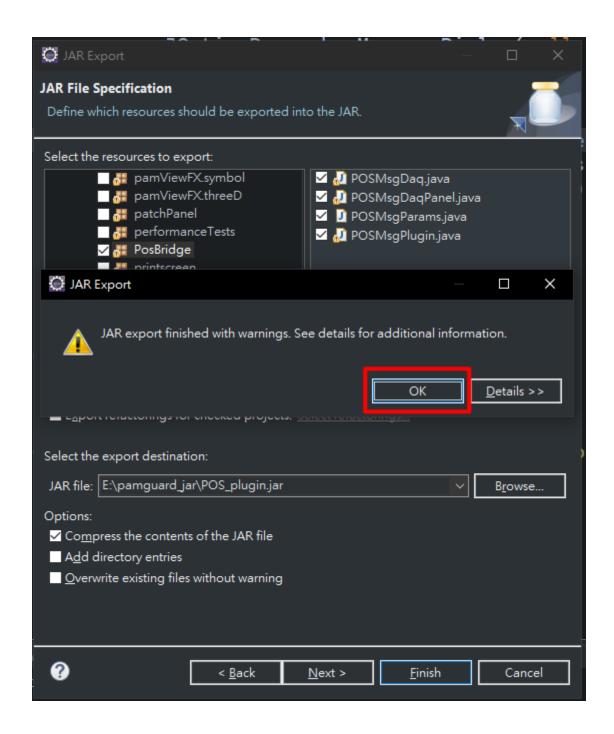

5. 勾選以下設定後,點選 Finish

6. 跳出警告訊息,不須理會,直接按 OK

7. 在輸出路徑下即可看到產生後的 jar 檔案

8. 將此檔案搬到主程式底下的 plugin 資料夾即可使

用
